Career Outcomes

Upon completion, you may pursue roles such as:

- Painter
- Painter and Decorator

Pathway Opportunities

Graduates may progress to Diploma in Building and Construction, or other specialisations in the construction sector.

Course Information

- Twenty-nine (29) units including twenty-six (26) core units and three (3) elective units are required for the award of the CPC30620 Certificate III in Painting and Decorating. Units have been selected in accordance with the packaging rules and are relevant to the work outcome, local industry requirements and qualification level. The latest release of the qualification and packaging rules can be found at the following link: https://training.gov.au/Training/Details/CPC30620.

- This is a qualification for building professionals who manage residential and commercial projects, applying specialised knowledge of structural principles, risk and financial management, and legal contracts.

- Industry standards affirm that training must occur in real-world settings; candidates gain essential experience through mandatory access to live building environments for administrative and quality control oversight

- State and territory jurisdictions may have different licensing, legislative, regulatory or certification requirements. Relevant state and territory regulatory authorities should be consulted to confirm those requirements. In Victoria, the licencing is regulated by Building and Plumbing Commission, formerly the VBA, see: https://www.vba.vic.gov.au/

South Morang VIC 3752

Why should you apply for this course?

- Construction Leadership Credentials: Launch or advance your career as a building professional with the formal qualifications required to pursue high-level roles such as a Builder, General Foreperson, or Building Inspector.
- Master Complex Projects: Gain specialised expertise in managing structural principles, financial systems, and legal contracts for residential and commercial Class 1 through Class 9 building projects.
- Industry-Driven Learning: Bridge the gap between theory and practice with expert classroom instruction and mandatory site visits to live building environments, using industry-standard documentation and analysis
